

# Own the BIM Process!

BIMcontact is a Cloud based file management solution that provides full document control and data management for building projects.

Its unique inbuilt 2D and 3D model viewers connect teams to models and project data, in real time, allowing full collaboration and better visibility.

**Main contractors** can collaborate, manage and engage better with the entire supply chain. **Reducing errors, reworks and risk.** Provide all data, drawings and models to the Developer complying with PAS1192/2 and working to BIM Level 2 in a **secure Common Data Environment (CDE)**.

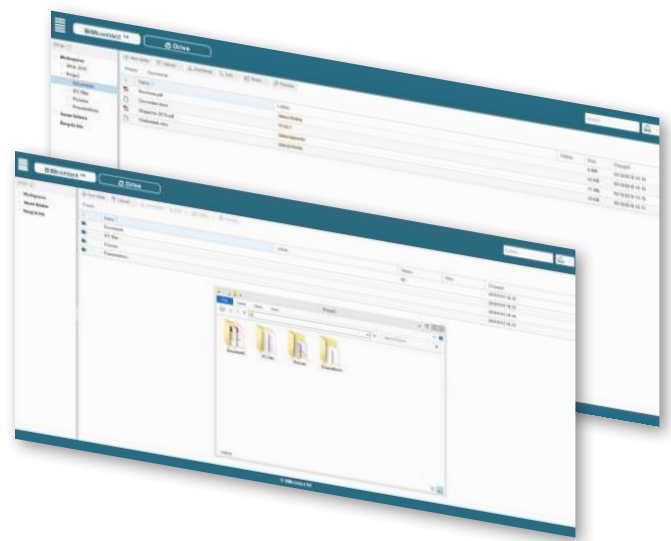

**Developers** can take control and ownership of all the graphical and non-graphical data for the entire project life cycle, increasing knowledge, reducing the information cost and improving the performance of the built asset.

## File Collaboration

BIMcontact offers plenty of ways to collaborate and share files with Portal members as well as with external users. Advanced and customizable permissions can adapt to any project structure.

Work locally and offline with 2-way file synchronization by using the BIMcontact Drive app, available in both Windows and Mac. The Drive app offers the user the ability to work locally as usual and automatically backup the files on the cloud so that others can easily access them and collaborate.

- ✔ Permissions
- ✔ Labels
- ✔ Smart folders
- ✔ Version control
- ✔ 2-way synchronization
- ✔ Work locally & offline

- ✔ **Free Trial for 30 days**
- ✔ **Free Demo, without any obligations**
- ✔ **Fully scalable to any project size**

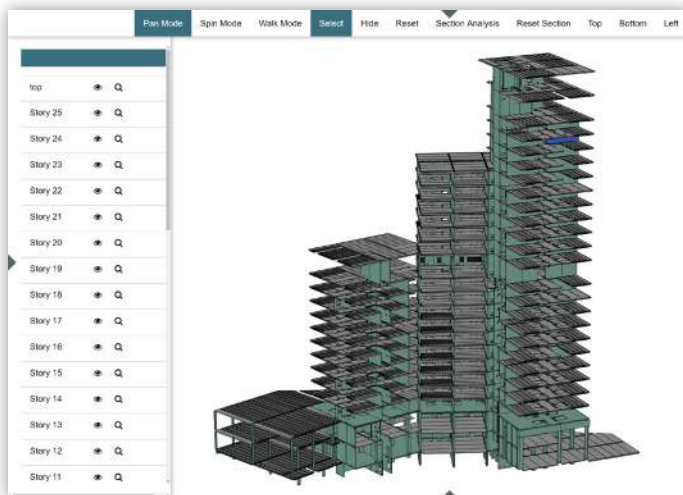

## Cloud Platform

As a cloud platform, BIMcontact is easy to access from any Internet browser. It allows for easy document management with the possibility to view online over 250 file formats.

Everything stays backed up safely on the cloud and all file versions are retained for future reference.

Data is hosted by Amazon Web Services in secure, fast and scalable servers.

## BIM Management

BIMcontact offers state of the art IFC and DWG online viewers with the ability to interact with models in a 2D & 3D environment, all straight from the browser.

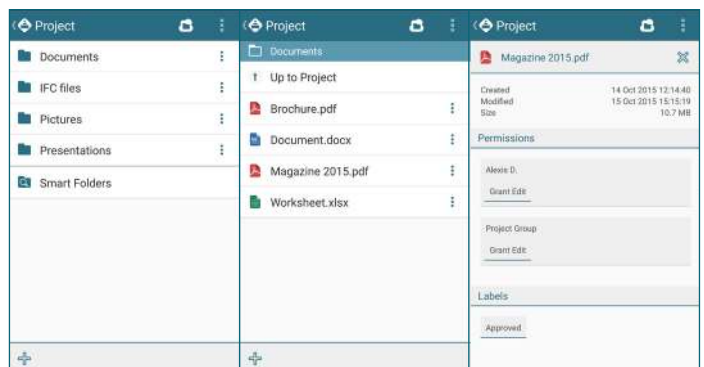

Features like annotations and version control facilitate collaboration and exchange of information between teams.

- ✓ Annotations
- ✓ No installation needed
- ✓ Element specifications
- ✓ Layers
- ✓ IFC classes
- ✓ Sections and more

For **BIM collaboration** on building projects; **improved planning**; **less errors**, greater **supply chain visibility**; all files and project data **secure in the Cloud**; and ultimately **improved knowledge** and **performance** of built assets, choose **BIMcontact**.

## Mobile Apps

BIMcontact is available for both Android and iOS devices. The app offers access to a BIMcontact Portal for management, viewing, downloading and uploading files on the go.

**StruSoft**

StruSoft is an innovative Swedish software company with more than 35 years of experience in specialized software applications for analysis, design, modelling and energy for the building industry.

#### BIMcontact

Web-based project collaboration, IFC-viewer and document management system for the building industry.

#### FEM-Design

Finite element software for analysis and design of load-bearing concrete, steel and timber structures.

#### WIN-Statik

A suite of easy to use applications for common design tasks such as beams, columns or frames.

#### PRE-Stress

Analysis and design software for complete product life calculations of prestressed beams.

#### IMPACT

A family of BIM software to efficiently manage, design, produce, transport and erect prefabricated concrete elements.

#### VIP-Energy

Fast energy balance analysis for buildings using a dynamic calculation engine.

Villa Suprême, the head office in Malmö, Sweden
